PROJECTS

Smart Waste Management Systems

Waste management is a major challenge in urban areas due to overflowing bins, poor collection systems, and lack of real-time monitoring, leading to unsanitary conditions.

Smart Cold Chain Monitoring System For Perishable Goods

A Smart Cold Chain Monitoring System uses IoT sensors to track temperature and humidity in real time, ensuring product quality, reducing spoilage, and improving cold chain efficiency.

Automated Water Distribution System In Rural Infrastructure

An Automated Water Distribution System uses sensors to control water supply automatically.

It reduces wastage and ensures efficient, equal distribution.
